

# "Lets Hear Salford"

"Lets Hear Salford" will be a local implementation of Hearing Link a UK charity active in England, Scotland, Wales and Ireland for people with any level of hearing loss, their family and friends. We understand that hearing loss affects far more than a person's ears.

The consequences can impact on every part of their life: relationships, status at work, confidence and self-esteem. Through shared experiences, practical support and guidance from people who experience hearing loss themselves, we enable others living with hearing loss to reconnect and embrace life, whatever their level of hearing.

We do this by:

- Connecting people with one another so that they can help each other to develop the confidence and skills to overcome daily emotional and practical challenges and remain active in their communities
- Providing information, advice, signposting and specialist support tailored for each individual offering the knowledge and skills they need for good communication
- Offering a website, helpdesk, and connections through social media and
- Raising awareness and understanding of the profound impact of hearing loss on every aspect of life, so that everyone knows how to achieve better communication.
