

# Focus on the future

**MICRO LOANS**

**SRI LANKA**

**SAND DAMS**

Focus on  
future

- Sand dams
  - We want to work with Excellent to build a sand dam
  - We want this to be a District Project with;
    - Objectives
    - Project Plan
    - Deadline for completion

A sand dam costs £25-40k and takes 1-2 months to build – but each dam can store up to 40 million litres of water and can last over 60 years with virtually zero maintenance costs

How Much does a sand dam cost?

# Our Aims

What do we want the Clubs in 1040 to do?

Raise Money for this project £20k

Timescale – A dam to be built 18 months from now

Our ambition is to see this project being supported by every club in the District

To have a project plan with milestones

Agreed between the District and Excellent

Regular reports on progress from Excellent

Transparency

We want see how our money is being spent

We want the money spent to be on a specific project
